

RESEARCH STUDY – HORMONAL CONTRACEPTIVE PATCH

Clinical Study for Healthy Females Ages 18-35

BE PART OF CLINICAL RESEARCH

We're looking for healthy females ages 18-35 to participate in a clinical research study. Clinical research helps researchers learn more about healthcare products before they become widely available. By participating in a study, you contribute to research that helps shape the future of healthcare.

Study 2934 Overview

We are conducting a clinical research study to evaluate a hormonal contraceptive patch in healthy females. Researchers will assess how well the patch remains in place during a 7-day wear period.

Females 18-35
Healthy volunteers

7 DAYS
Patch wear period

PATCH ADHESION
How well it stays in place

WHAT DOES PARTICIPATING MEAN?

As a study participant, you may complete health assessments, attend clinic visits, stay overnight at the clinic when required, and use a study product while researchers collect important information.

Before joining, you'll receive detailed information about the study, can ask questions, and decide whether participation is right for you.

Study Site: 4000 Weston Rd., Toronto, ON

2

STUDY PERIODS

2

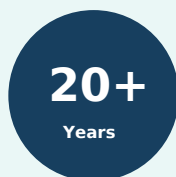

NIGHT STAYS EACH PERIOD

6

RETURN VISITS EACH PERIOD

\$2,850

TOTAL COMPENSATION

Who is BioPharma Services?

We have been conducting clinical research studies since 2006. Our experienced team is committed to creating a safe, respectful, and supportive experience for every participant. Participant safety, privacy, and well-being are always our top priorities.

MEDICAL OVERSIGHT

PARTICIPANT PRIVACY

RESPECTFUL SUPPORT

REGISTERING IS NOT CONSENT

Sharing your interest does not commit you to join. You will receive the study details, can ask questions and decide whether participation is right for you.

What Participation Looks Like

1 SCREENING

Review the consent form, ask questions and complete health and eligibility tests.

2 PERIOD 1

Check in for two nights, receive one patch, then wear it at home and complete six return visits over seven days.

3 PERIOD 2

Repeat the same schedule with the other patch after the study-defined break between periods.

Overnight Stays Available on the Weekend

Could You Be Eligible For This Study?

YOU MAY QUALIFY IF YOU ARE

Sex: Female

Age: 18-35

Health: Generally healthy and not pregnant or breastfeeding

Smoking: No smoking or nicotine use for at least 6 months

Body size: BMI 18.5-30.0 and weigh no more than 90 kg (198 lbs)

Contraceptive history: Previously used hormonal contraception without complications

WHAT SCREENING MAY INCLUDE

Health review: Medical history, physical examination, vital signs and ECG

Testing: Blood and urine tests, including pregnancy, nicotine, alcohol and drug screening

Breast exam: Performed by the study doctor

How Compensation May Be Scheduled

PERIOD 1 EXIT	PERIOD 2 EXIT	END OF STUDY
\$700	\$1,000	\$1,150

Payment is tied to completed study activities and the payment terms in the informed consent form.

Common Questions

Do I stay for all 7 days?	No. Each period includes a two-night clinic stay. You then wear the patch at home and return daily until removal.
What if the patch loosens?	Contact study staff immediately. Do not press it down, reapply it or replace it yourself.
Will I have access to wi-fi?	Yes, you will have access to our facility's wi-fi internet during visits.
Will I need to change my birth control?	If you currently use hormonal birth control, you must complete a washout period before switching to the patch for the duration of the study. Do not stop your current method until instructed.
What is a washout period?	It is the required time between stopping current hormonal birth control and receiving the study patch. The length varies by contraceptive type.
Can I change my mind?	Yes. Participation is voluntary. Staff may request safety follow-up, and compensation is based on completed study activities.
